# We're a data performance company.

**Burst is thinking about our customers' data differently,** so they can continue to grow and move their business forward. We know our customers need to move fast, and so does their data. Burst's cost-effective data migration and performance management solution opens up new opportunities and capabilities that continually prepare organizations for success.

We use photography, illustrations, and iconography to communicate how we make cloud decisions work for our customers - through data performance, data migration, data cost-management, data availability, and data control and security.

Burst is always written in sentence case, with the exception of the logo.

SoftNAS is written as Burst's SoftNAS on the first mention, and SoftNAS on following mentions.

# Logo System

The Buurst logo is a representation of the energy and trust our brand provides. The primary logo should always be the default logo. The logo was designed in a way to scale up and down so that the “UU” treatment is legible. The lowest recommended logo height is 15px. Legibility should always be considered when placing the logo. To the right are acceptable alternative uses and guidance on clear space. The following page will dive deeper in what not to do with the Buurst logo.

Primary logo

Logo with tagline

Alternative orange “UU” logo

Alternative Square Logo

This logo should only be used for social media and marketplace profile images.

With Trademark

Clear space based on “UU”

Minimum height 15px

B/W logo

## Restrictions

The primary Buurst logo should always be honored in its original form. It should never be stretched, skewed, twisted or manipulated in any way. It is the foundational element that anchors Buurst within assets. To the right are a couple of examples of what NOT to do with the Buurst logo system.

❌ Do not change the color of the original logo

❌ Do not only use one "U" in the "UU" treatment

❌ Do not stretch the logo vertically or horizontally  
Do not change the original shape of the logo in anyway

❌ Do not place colored Buurst logo on top of imagery

❌ Do not place the primary colored logo on a background color

**\*Note:** It is acceptable to use the white and black logos over an image. Provided that there is clear legibility and contrast between the logo and the imagery. It should never be used atop a complicated or detailed image.

❌ Do not use Buurst square logo outside of marketplace

❌ Do not put any elements or shapes behind or in the clear space of the logo

# Color Palette

**The primary color palette**, a core pillar to Buurst branding, should be strictly adhered to. Primary Blue and Primary Orange can be used individually as design elements, but shouldn't be considered when layering (using either orange over blue or blue over orange). If needing to layer Primary Blue or Primary Orange, consider utilizing Primary Oxford Blue to enhance contrast.

**The secondary color palette** adds a depth of blues and grays which can be used in unison with the primaries. This palette can be used within graphical elements, illustrations and sometimes iconography, but should be used sparingly as hero elements.

## Primary

## Secondary

## Color Palette

### Accent colors

The **alternative color palette** provides depth of color to the primary color palette. These colors should be utilized sparingly within illustrations and icons to represent “good” or “bad”.

**Gradients** can be used in tandem with the primary color palette. They shouldn’t be overused and never used alone. The #081733 gradient should only be used over imagery and sometimes with transparency such as, multiply.

#### Alternative

Green  
#45E54F

Red  
#FF004F

#### Gradients

#057DDC

#42D6FF

#081733 to 0% opacity

# Typography

Buurst's type system blends two fonts to offer readability and a futuristic personality to the brand. Open sans provides a neutral, yet friendly appearance, while Ratio leans more to a geometric approach to letterforms.

## Open Sans

For headlines, subheads, and labels.

Aa

A B C D E F G H I J K L M N O P Q R S T U V  
W X Y Z a b c d e f g h i j k l m n o p q r s t  
u v w x y z 1 2 3 4 5 6 7 8 9 0 ! @ # \$ % ^ &  
\* ( ) - \_ = + ` ~ [ ] { } \ | ; : ' " / ? , . < >

## Ratio

For low-tier subheads, body copy, and utility copy.

Aa

A B C D E F G H I J K L M N O P Q R S T U V  
W X Y Z a b c d e f g h i j k l m n o p q r s t u  
v w x y z 1 2 3 4 5 6 7 8 9 0 ! @ # \$ % ^ & \* ( )  
- \_ = + ` ~ [ ] { } \ | ; : ' " / ? , . < >

## Verdana

For system font replacement.

Aa

A B C D E F G H I J K L M N O P Q R S T U V W  
X Y Z a b c d e f g h i j k l m n o p q r s t u v w  
x y z 1 2 3 4 5 6 7 8 9 0 ! @ # \$ % ^ & \* ( )  
- \_ = + ` ~ [ ] { } \ | ; : ' " / ? , . < >

# Photography

Photography should be representative of our target audience – focused, serious, diverse, and technologically equipped. Photography should be polished, clean, and balanced. Imagery with people should represent a focused individual or team within a technical environment.

To add depth to the selection of images, professional shots of architecture, cityscapes, and structural images can be used as elements representing a sense of scale and scope.

Human

Wide

Close

Metaphorical

# Illustration/Graphic elements

Illustration allows us to differentiate from competitors and connect with our audience through visual storytelling that is powerful, modern, and balanced.

Our illustrations are created with purpose, conveying technical concepts and incorporating brand elements like color and iconography.

## Tips:

**The data grid** is the base of a lot of our illustrations. It can be used on white and dark backgrounds. It is made up of perfectly aligned squares that have circle and triangular highlights.

**Hero illustrations** are a less abstract style of Buurst graphical elements. They combine an iconographical look with a data grid. They use a mix of color, but should be limited to orange, blue, and grey/white. Thin lines can add movement and energy to the main visual and should be thought out in accordance to the subject matter.

Data grid

Buurst lines

Abstract illustration

Hero illustration

# Iconography

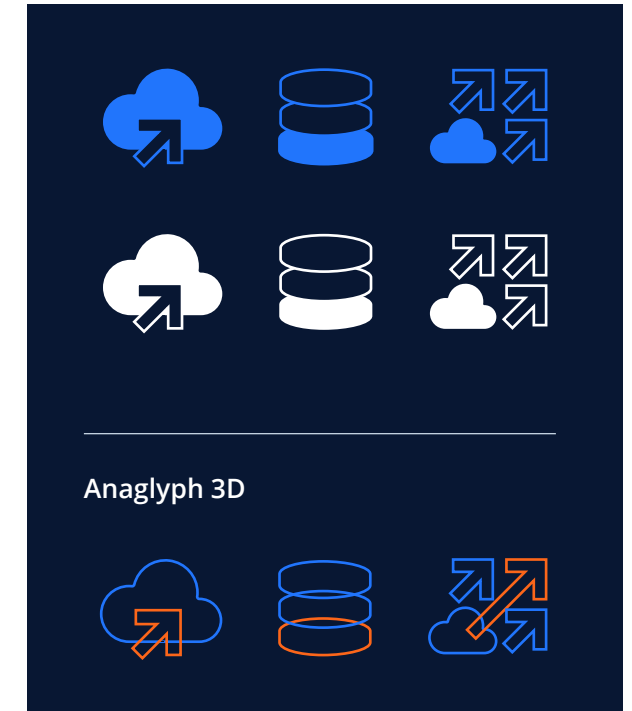

Our iconography is clean, bold and stark. The iconography should provide a balance against the other elements within the brand. The stroke should be 1pt in size. Default to the bright blue #2175FC within the secondary palette for extra radiance. Black and white can be used on iconography when needed.

**The Anaglyph 3D icon set** can be used within illustrations or in content documents. It's vibrant mix of orange and blue help further the brand impact, but should be used sparingly.

## Light background

## Dark background

# Diagrams

Our diagrams clearly communicate their intended technical purpose.

We have limited the amount of color to:

#2175fc | #081733 | #D1E0ED

Black and white are acceptable within diagrams when needed. For connecting lines stick to a 1pt stroke and for dashed lines default to 4px gap and 4px dash.
